# SDG16 Overview

Promote Peaceful and Inclusive  
Societies for Sustainable  
Development, Provide Access to  
Justice for All and Build Effective,  
Accountable and Inclusive  
Institutions at All Levels

# Accountability & Transparency

- Develop **effective, accountable and transparent** institutions at all levels
- Ensure public access to information and **protect fundamental freedoms**, in accordance with **national legislation** and international agreements
- Promote the rule of **law** at the national and international levels and ensure equal access to justice for all
- Promote and enforce non-discriminatory **laws and policies** for sustainable development (legislature)
- **Ensure responsive, inclusive, participatory and representative decision-making at all levels**

# Crime and Corruption

- Significantly reduce all forms of violence and related death rates everywhere
- **End abuse, exploitation, trafficking and all forms of violence against and torture of children**
- Strengthen relevant national institutions, including through international cooperation, for **building capacity at all levels**, in particular in developing countries, to prevent violence and combat terrorism and crime
- By 2030, significantly **reduce illicit financial** and arms flows, strengthen the recovery and **return of stolen assets** and combat all forms of organized crime
- **Substantially reduce corruption** and bribery in all their forms

# Global participation

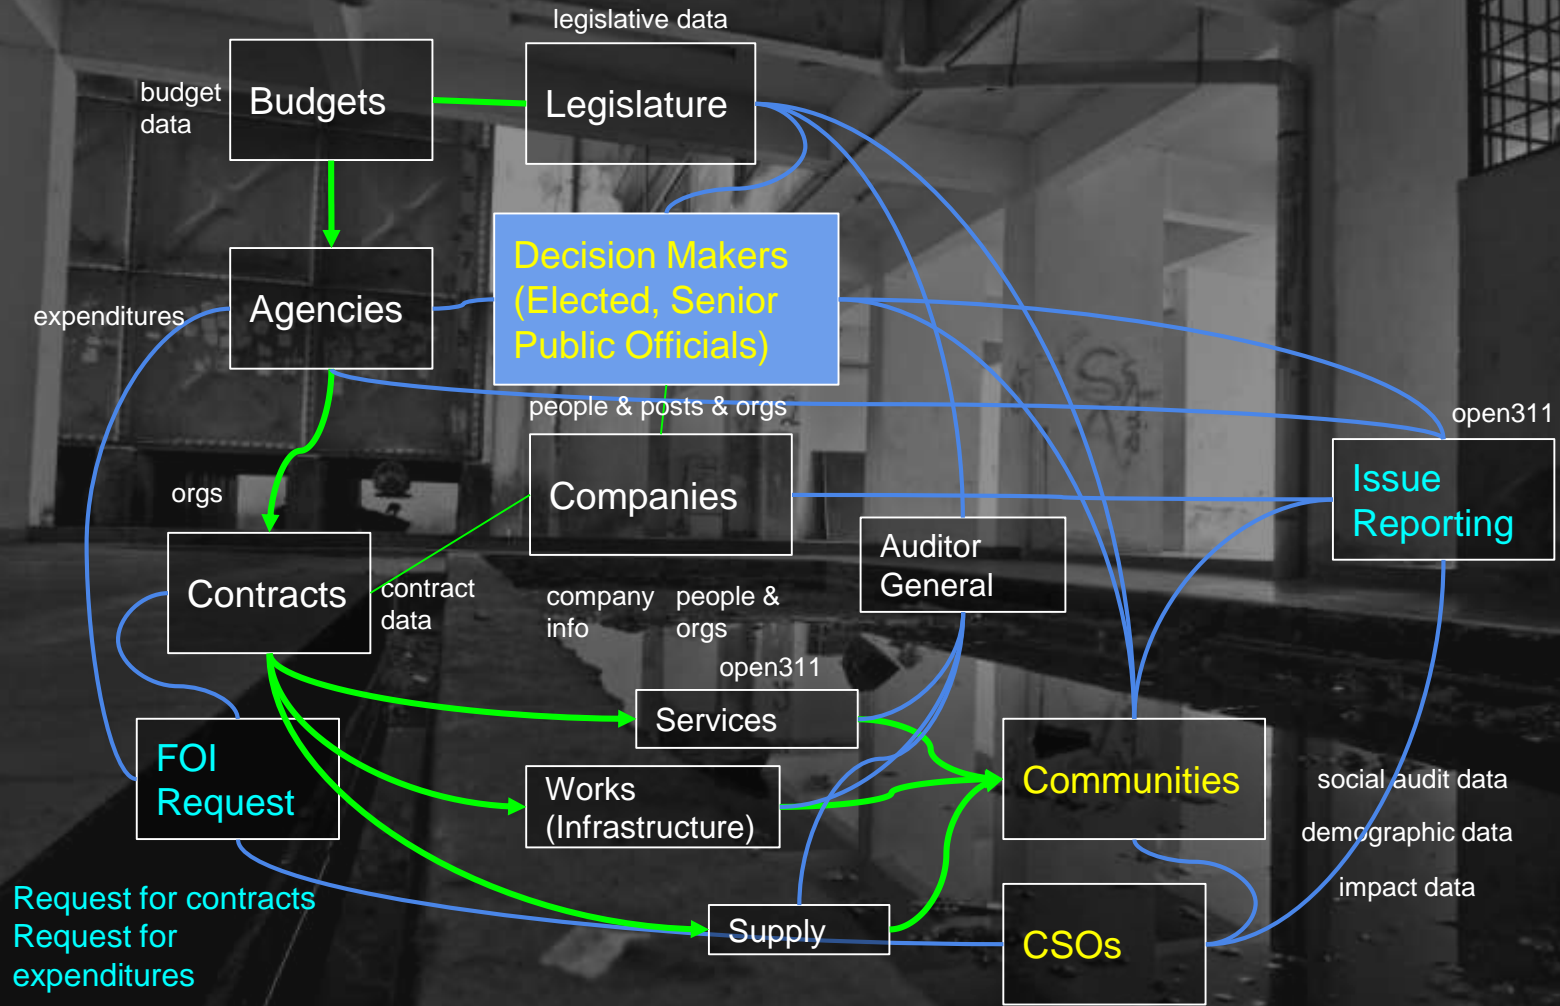

- Broaden and strengthen the participation of developing countries in the institutions of global governance

# Other(?)

- By 2030, provide legal identity for all, including birth registration

# Open Government & Open Data

Government that can  
work for the people,  
by the people in the  
21st Century

Open Parliament

# Feedback loop

- Citizens and Civil Society raise their concerns via their elected representatives
- Executive are answerable to elected representatives
- Government have to provide answers to executive

Open Legislative Data  
needed to build  
applications to access  
decision makers

## Geocoder

Geocoder service returns listing code for a given street address. <http://www.mapitcode.com/v1.0/> provides a number of different geocode service providers which we could use.

For Malaysia, Google's service returns the most accurate results, based on street names.

```

In [23]: from geopy.geocoders import GoogleMap

In [24]: street_address = "Jalan SS12/40, Subang Jaya, Selangor"

In [25]: api_key = "AIzaSyC0NK1M0L1MwFqj4M0Z_g1430wv7DdI" #edit key for your own use from https://www
          #s2l.developers.google.com
          geocoder = GoogleMap(api_key=api_key)
          geocode = geocoder.geocode(street_address)

In [26]: geocode
Out[26]: Location((13.981213, 101.5844188, 0.0))

In [27]: reversed_geocode = geocode[1][:-1]
          reversed_geocode #MapIT API uses this form

Out[27]: (101.5844188, 3.981213)
    
```

We now have a geocode in format that Mapit service can use to give us information on electoral boundaries.

# OCDS Red Flags

This tender featured a single bidder only

Allowing an unreasonably short time to respond to requests for bids

Bidder that has never bid previously wins tender

Bid is too close to budget, estimate or preferred solution

Bids are an exact percentage apart

Only the winning bidder was eligible to have received the contract for this tender

Flag 1: This tender features a single bidder only\*

Flag	Why we care	Type	Fields	Sample calculation
This tender features a single bidder only	A single bid tender may indicate lower than ideal competition, which may result in award values above competitive market price	Binary	OCDS: tender/id; tender/tenders	Add a binary flag (0,1)

## The Philippine Center for Investigative Journalism meets Open Contracting

In September 2018, the Philippine Center for Investigative Journalism (PCIJ) published a series of stories exposing how President Rodrigo Duterte had poured billions of pesos in infrastructure funds into his home region, Davao. Their reporting also revealed that most of the infrastructure contracts had gone to a company owned by the family of Duterte's Special Assistant and right-hand man, Christopher Lawrence "Bong" Go, and that many of these projects were not even close to completion.
